MODERN HISTORIC TAPESTRIES

GLOSSARY: WALLPAPER	
Panorama	*Panorama* indicates that a design has a *Lateral Repeat*.
LR	The *Lateral Repeat* is the width of a design that is achieved before the re-introduction of the first drop; it is only applicable to Panorama's.
PA	*Print Allowances*: the nature of the mural designs necessitates PA's in the vertical dimension (VPA) and, where we are printing onto "overlay and cut through" grounds, in the lateral dimension (OPA).
VPA	The *Vertical Print Allowance* is a printed allowance at the top and bottom of each drop. This will usually be a total of 20 cm split equally top & bottom; for Bespoke Wallpaper it will vary and will be indicated in the specification for the job.
OPA	The *Overlay* or *Overlay Print Allowance* is a printed allowance at the sides of each drop that allow the installer to overlay and key drops into position prior to cutting through; the OPA is usually 1-2cm on each side.
MB	*Mirror Bleed* is a specific type of PA created by mirroring outer sections of a design to create some additional tolerance.
TPD (Design)	The *Total Print Dimensions (Design)* are the dimensions of the whole design including the *Print Allowances* on the external edges, prior to any lateral drop repeat.
NPD (Design)	The *Net Print Dimensions (Design)* are the dimensions of the whole design net of any *Print Allowances* prior to any lateral drop repeat.
TPD (Drop)	The *Total Print Dimensions (Drop)* are the dimensions of a drop including the *Print Allowances*.
NPD (Drop)	The *Net Print Dimensions (Drop)* are the dimensions of a drop of wallpaper net of any *Print Allowances*.
KP	The *Key Point* is a point on the wall that must be "keyed" together with a point on the first drop of wallpaper to ensure that the whole design is positioned correctly on the wall. (See Wallpaper Hanging Instructions pdf.)
BW	*Bespoke Wallpaper* refers to wallpaper designs that have been adapted and printed to a client's specification.
DLP	The *Design Layout Plan* is a diagrammatic representation showing the positioning of the wallpaper drops in the space. (For Bespoke Wallpaper only.)
